

Thomas Hansen

Senior Web Developer

Aarhus, Denmark | thomas-hansen-portfolio.vercel.app | codespecter0527@gmail.com

SUMMARY

Senior Web Developer with 6 years of experience delivering scalable, high-impact web and mobile applications. Expert in React, React Native, and full-stack development, with a proven track record of reducing load times by up to 70%, improving retention by 40%, and supporting apps with over 1 million users. Adept at building robust architectures, optimizing performance, and mentoring development teams. Passionate about writing clean, maintainable code that drives measurable business value.

EDUCATION

Bachelor of Science in Computer Science

Roskilde University (RUC), Roskilde, Denmark | August 2015 – June 2019

- Focused on software design, algorithms, and databases through project-based learning.
- Built a full-stack capstone project (React + Node.js) adopted by a local nonprofit.
- Completed a React Native internship project improving app performance by 50%.
- Worked in international, cross-disciplinary teams using Agile methodologies.

WORK EXPERIENCE

Senior Web Developer

Netcompany – Remote (Warsaw, Poland) | March 2024 - Present

- Leading front-end architecture for government and enterprise web platforms using Next.js, React, and GraphQL.
- Designed a modular form workflow system now used across four public sector platforms.
- Coordinated Agile sprints across 3 globally distributed teams.
- Mentored junior developers and led React performance workshops.

React Native Engineer

Monstarlab – Copenhagen, Denmark | December 2022 - February 2024

- Delivered cross-platform mobile apps for fintech and retail clients.
- Integrated Stripe payments and Firebase Auth in secure, production-ready apps.
- Delivered MVPs under tight deadlines (e.g., 10-week launch for a major fashion brand).
- Built a reusable component library that cut dev time by 25%.

Full Stack Developer

Tactile Games – Copenhagen, Denmark | September 2021 – November 2022

- Developed internal tools for mobile game analytic using React Native and Node.js.
- Reduced crash rates by 60% for a mobile game with over 10M downloads.
- Implemented CI/CD pipelines with GitHub Actions, boosting deployment speed by 30%.
- Conducted regular code reviews and mentored two junior developers.

Frontend Developer

Trifork A/S – Aarhus, Denmark | June 2019 – August 2021

- Built responsive web apps for healthcare and logistics clients using React, Redux, and TypeScript.
- Improved task completion rates by 35% through UX collaboration.

- Integrated real-time dashboards using Socket.IO and REST API.
- Led migration from Angular Js to React across 3 enterprise projects.

TECH SKILLS

-Frontend

React, Next.js, React Native, Redux, TypeScript, Tailwind CSS, Material UI, Styled Components, HTML5, CSS3, SCSS

-Backend

Node.js, Express, GraphQL, REST APIs, NestJS, JWT, Socket.IO

-Database

PostgreSQL, MongoDB, MySQL, SQLite, Prisma, TypeORM, Mongoose

-Mobile

React Native, Expo, Push Notifications, Fast-lane, Mobile Optimization

LANGUAGES

-**Danish:** Native

-**English:** Professional Proficiency(technical fluency)

INTERESTS

Open Source Contributions – Focused on improving UI/UX in community projects

Mobile UX & Animation – Building smooth user interactions with React Native

Developer Community – Participating in meetups and hackathons

Cycling & Outdoor Sports – Staying physically and mentally balanced
